

SEO Assessment

Section A – Basics (Short Answers)

1. What is SEO? Explain On-Page and Off-Page SEO

Ans:

SEO (Search Engine Optimization) is the process of optimizing a website to improve its visibility in search engines like Google so that it ranks higher in search results and gets more organic (free) traffic.

◆ On-Page SEO

On-Page SEO refers to optimizations done **inside the website**.

Examples:

- Optimizing title tags & meta descriptions
- Using proper keywords
- Improving content quality
- Optimizing images (alt text)
- Internal linking
- Improving page speed

◆ Off-Page SEO

Off-Page SEO refers to activities done **outside the website** to improve authority and trust.

Examples:

- Backlinks (link building)
- Social media sharing

- Guest posting
- Influencer outreach
- Brand mentions

2. Define keywords. What is the difference between short-tail & long-tail keywords?

Ans:

- ◆ What are Keywords?

Keywords are the words or phrases that users type into search engines to find information.

Example:

If someone types “best yoga for weight loss”, that phrase is a keyword.

- ◆ Short-Tail Keywords

- 1–2 words
- Very broad
- High search volume
- High competition

Example:

- “Yoga”
- “SEO tools”

- ◆ Long-Tail Keywords

- 3 or more words
- More specific

- Lower search volume
- Lower competition
- Higher conversion rate

Example:

- “Best yoga poses for weight loss at home”
- “Free AI SEO tools for beginners”

3. What is Crawling, Indexing & Ranking?

Ans:

◆ Crawling

Search engines send bots (also called spiders) to scan and discover web pages on the internet.

◆ Indexing

After crawling, the search engine stores and organizes the content in its database (index).

◆ Ranking

When a user searches something, the search engine shows the most relevant pages in order of importance. This position in search results is called ranking.

4. What is a SERP? Mention any 3 SERP features.

Ans:

SERP (Search Engine Results Page) is the page displayed by a search engine after a user enters a query.

Example: When you search something on Google, the result page you see is called a SERP.

◆ **3 SERP Features:**

1. **Featured Snippet** – A highlighted answer shown at the top.
2. **People Also Ask (PAA)** – Related question boxes.
3. **Local Pack** – Map results for local businesses.

(Other features include Image results, Video results, Knowledge Panel, Ads, etc.)

5. What is domain authority?

Ans: **Domain Authority (DA)** is a score that predicts how well a website will rank on search engines.

- It ranges from 1 to 100
- Higher score = Higher ranking potential
- It is influenced by backlinks, content quality, and website trust

Websites with strong backlinks and high-quality content usually have higher domain authority.
